DETAILED ACTION

Response to Amendment

1. The response filed February 3, 2006 is acknowledged.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

3. Claims 1-16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 recites "the nozzle body member having a first non-adjustable restricted orifice" that was not disclosed in the application as originally filed.

Claim 1 recites "a first non-adjustable restricted orifice at the end of the adjustment member proximate to the first end of the nozzle body member." Claim 1 defines the first end of the nozzle body member having an inlet opening and the second end of the nozzle body member having an outlet. It appears that the disclosure, as originally filed, teaches a first restricted orifice 36 at the second end of the nozzle body member.

Art Unit: 3752

4. Claims 1-16 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the end" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Hinchman (2,517,877).

Hinchman discloses an adjustable gas nozzle comprising: a nozzle body member 8; a conduit 7; an adjustment member 25, 26 having a first non-adjustable restricted orifice 29; a coupling 16; a by-pass passageway 18; cooperative surfaces 19, 27; cooperating means 12, 32; a seal 14, 15.

Response to Arguments

6. Applicant's arguments filed February 3, 2006 have been fully considered but they are not persuasive.

Applicant argues that figure 2 shows a non-adjustable orifice, and therefore, it does not constitute new matter. The recitation "non-adjustable" requires that the orifice lack the ability to adjust. Even a rigid orifice has the ability to adjust by providing an insert in the orifice to control the size of the outlet. There was no explicit exclusion of the orifice being non-adjustable in the disclosure as originally filed.

Even so, Hinchman discloses an adjustment member 25, 26 disposed intermediate the conduit 7 and the nozzle body member 8 and having a first non-adjustable restricted orifice 29 at the end of the adjustment member 25, proximate to the first end (inlet opening end) of the nozzle body member 8.

Conclusion

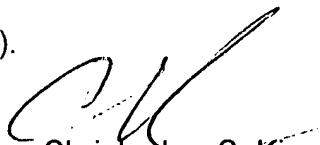

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
